Read and answer 1+1+2

All parts of the earth do not receive the same amount of heat from the sun because of the tilt of the earth's axis. The places near the equator have warmer climate conditions because they receive direct rays of the sun. The places which lie in the polar regions have colder climates because they receive slanting rays of the Sun.

Based on the text, answer the following questions.

1. Why do all parts of the Earth not get equals amount of heat from the Sun?
2. Why are the places near the equator warmer than other places?
3. Why are the polar regions folder?

V.

Read and answer. 1+1+2

Among the Vedas, the Rig Veda is the oldest. It was composed some 3,500 years ago. It contains 1,028 hymns, which were called sukta (well said). These hymns or prayers are in praise of various gods and goddesses. Some of the important God mentioned in the Rig Vedic are Agni (god of fire), Indra (god of storm, rain and war) the Varun (the sky god). These hymns were composed by sages.

Based on the text, answer the following questions.

1. Which of the Vedas is the oldest?
2. How many hymns are there in the Rig Veda?
3. Name three important God/ goddesses mentioned in Rig Veda.

VI.

Read and answer. 1+1+2

Diversity in social economic and political Spheres often causes inequalities. An unfair situation occurs when some people have more rights or better opportunities or resources than others. For example, differences in wealth create the rich and the poor classes. Poverty leads to lack of education, basic amenities medical facilities, etc. Some people live below the poverty line and struggle to survive, while some enjoy the luxuries of life.

Best on the above text, answer the following questions.

1. What causes inequalities in society?
2. What kind of classes do the differences in wealth create?
3. How does poverty effect people?

VII
